

Cameron type MG6P is a high activity granular activated carbon. Manufactured from specially selected grades of raw materials in order to provide a wide pore spectrum product. It is activated under rigidly controlled conditions to ensure consistency in quality. It exhibits excellent mechanical strength, relatively low Ash and is carefully screened to minimize dust content. It is particularly recommended for water and wastewater treatment and has proven very effective in spill control applications. Standard packaging is in 50 lb bags, 200 lb drums or 1,000 lb bulk bags.
