Refillable Panel Filters

Cameron Carbon offers carbon trays/panels in a wide range of both standard & custom sizes. The filters are designed to enable simple emptying and refilling of the media.

A variety of materials of construction are available. Standard construction is either cold-rolled steel with baked enamel finish or tin plated CRS. Epoxy coated and stainless steel filters are also available.

Cameron Carbon carries a large inventory of both new and reconditioned filters. This enables us to provide prompt response & service to end-users needs.

Cameron Carbon offers emptying & refilling servicing of used filters. Filters shipped to our facility are promptly serviced and returned to the client. Alternatively, for those clients where system down-time is critical, filters may be "advanced" to enable quick change-out on-site.
